ABOUT ME

I am an Information Technology Engineering student and Full Stack Developer focused on designing, developing, and implementing technology solutions. I have knowledge of backend and frontend development, REST API design, relational database management, and application development using technologies such as JavaScript, TypeScript, Node.js, NestJS, React, PostgreSQL, and MySQL.

My professional interests also include software architecture, Linux systems and server administration, computer networking, cybersecurity, and containerization and orchestration technologies such as Docker and Kubernetes. I strive to understand technology from an end-to-end perspective, encompassing application development, infrastructure, deployment, and maintenance.

I am characterized by analytical thinking, problem-solving skills, adaptability, and a strong commitment to continuous learning. My goal is to strengthen my technical expertise, contribute to challenging projects, and help develop secure, efficient, scalable solutions aligned with business needs.

EXPERIENCE

IT Assistant

Jun 2026 – Present

Empresa Pública de Acción Social y Educación de Guayaquil · Guayaquil, Ecuador

Manage the installation, configuration, updating, and commissioning of hardware, software, and applications required for institutional operations.

Perform preventive and corrective maintenance on IT equipment and infrastructure.

Provide technical assistance and support to internal users, addressing requests related to IT equipment, systems, and institutional technological tools.

Carry out preventive and corrective maintenance on IT equipment and infrastructure, ensuring proper functionality and availability.

Monitor and verify the performance of the network, connectivity, and institutional technological services.

Address, diagnose, and follow up on technical incidents related to equipment, systems, applications, and connectivity.

Execute and verify data backups and recovery processes.

Maintain an up-to-date inventory of institutional IT equipment, resources, and technological assets.

Provide technical and administrative support for the management of requests, documentation, and activities within the Information and Communication Technology (ICT) Department.

Prepare, manage, and monitor public procurement processes for the acquisition of Information and Communication Technology (ICT) goods and services, in compliance with current regulations and institutional procedures.

Owner

Apr 2023 – Present

Devgametools · Guayaquil, Ecuador

Development of the CV Rails platform (cvrails.com)

Development of cross-platform web applications (Full Stack)

Experience with technologies such as NestJS, NodeJS, React, React Native, Prisma ORM, Git, and Docker.

Programming languages: JavaScript, Python, Java, C#, Rust.
